

JAMAL HASSAN ABU ATTAYA

SOFTWARE & APPLICATION SECURITY

jamalabuattaya@gmail.com | LinkedIn | Portfolio
GitHub | Israa University | UCAS

ACADEMIC PROGRESS | 106 CREDIT HOURS COMPLETED | 30 CREDIT HOURS REMAINING

PROFESSIONAL PROFILE

Mobile Computing bachelor's student and Information Security diploma student building a career in software and application security. Academic and practical foundations span Java programming, Android development, databases, software engineering, networks, operating systems, access control, threat and risk analysis, social engineering awareness, and responsible security reporting. Recognized for clear communication, leadership, persuasion, teamwork, and disciplined problem solving.

EDUCATION

B.Sc. in Mobile Computing | 2023 - Present

Israa University - Faculty of Engineering and Information Technology | 106 credit hours completed; 30 remaining

Diploma in Information Security | 2025 - Present

University College of Applied Sciences (UCAS) | First two semesters completed: 17 courses, 37 credit hours

CORE TECHNICAL FOUNDATION

Programming & Mobile: Java, object-oriented programming, algorithms and data structures, Android development with Java, mobile UI, SQLite.

Data & Software Engineering: SQL, MySQL, relational modeling, ERD, normalization, requirements analysis, UML, testing, documentation, UI/UX foundations.

Application & Information Security: CIA principles, endpoint security, authentication and authorization concepts, access-control analysis, API traffic review, IDOR/BOLA awareness, responsible disclosure, threat and risk analysis, social engineering awareness.

Networks & Systems: TCP/IP, IP addressing, subnetting, routing, VLANs, DHCP, ACLs, operating systems, Windows Server, AD DS, DNS; cloud and machine-learning foundations.

Web Foundations: HTML, CSS, JavaScript fundamentals; familiarity with secure web-development concepts and REST APIs.

SELECTED PRACTICAL WORK

Responsible Security Disclosure | *Application Security*

Analyzed a horizontal authorization weakness in a student-information API, organized HTTP/JSON evidence, and prepared a remediation-focused report aligned with OWASP API1:2023 and CWE-639.

Secure Portfolio Engineering | *Next.js / TypeScript*

Improved a personal portfolio with typed content, secure headers, validated contact handling, accessibility fixes, media optimization, metadata, and automated quality checks.

Mobile, Database & Infrastructure Labs | *Academic Practice*

Built Java/Android exercises with local data storage and completed hands-on labs in SQL, routing, VLANs, DHCP, ACLs, operating systems, and directory/network services.

COMPLETED SECURITY DIPLOMA COURSEWORK

Computing + Lab | Information-Age Ethics | Programming + Lab | Networking Principles + Lab | Advanced Networks + Lab | Databases + Lab | Operating Systems | Social Engineering Awareness | Threat & Risk Management | Personal Computer Security | Arabic | English

CURRENT ACADEMIC FOCUS & PROFESSIONAL STRENGTHS

Remaining 30-credit focus: frontend development, backend development, cross-platform mobile applications with Flutter, and advanced project-based study.

Strengths: communication, leadership, persuasion, teamwork, problem solving, technical documentation, ethical judgment, and continuous learning.

Languages: Arabic (native); English (academic and technical communication).
